MWANAISHA SALIM

Profile

ICT support professional and Software Development graduate with experience at Posta Kenya testing applications, documenting software faults, troubleshooting communication systems, and improving a multipage web application. I bring a methodical approach to investigating technical issues and explaining findings clearly, with a focus on reliable, usable systems. My background in React.js, Python, API integration, web research, and confidential programme data strengthens my ability to understand digital services, maintain accurate records, and learn new systems.

Experience

Sep 2026 - Present
Graphibytes

Web Researcher

Research online sources to answer project questions, cross-check information for accuracy, and organize findings into clear summaries with source references.

Apr 2026 - Aug 2026
Ameer Creatives

Graphic Designer

Created social media graphics, campaign artwork, and branded digital content. Adapted layouts and visual assets for different platforms while meeting briefs and deadlines.

Dec 2024 - Apr 2026
Solomons International

Web Developer

Designed and deployed scalable web applications using React.js and Python, integrated secure APIs, and supported cloud-based environments.

Sep 2024 - Dec 2024
UNICEF (Yunitok) & World Vision

Data & Field Operations

Conducted UNICEF field surveys and served as a World Vision rapporteur, recording discussion points, summaries, and confidential programme data.

May 2024 - Aug 2024
Posta Kenya

ICT Assistant Officer

Tested applications to identify software issues, documented faults and findings, and provided troubleshooting for communication systems. Helped streamline a multipage web application to improve usability.

Selected Projects

Design Portfolio	Social media artwork, campaign graphics, and community-focused visual design.
Afripath Education	Education platform with clear content structure and an approachable user experience.
Enzi Store System	Database-backed store management application built for reliable data handling.

Education

2021 - 2024
KCA University

Bachelor of Software Development

Graduated with Second Upper Class Honours, with coursework in database management, web development, and programming fundamentals.
